General Rules:

Always contact the leader in advance of attending any trip. In advance of any new or out of state trips, always maintain close contact with the leader for special instructions and last minute changes. Be certain that accurate phone and /or email addresses are given to the leader and updated as needed. Some trips may be limited in size at the option of the leader. Always arrive early. Be sure to fully understand the rules and instructions. Safety is our main concern. **NEVER do anything which might endanger you or other collectors. Children, where permitted, must always be under your direct control and supervision.**

Safety rule violations are a sure way to lose all fossil-collecting privileges at any site.

Trip Information

PCS: The following is required this Spring: Photo ID, Steel-toed footwear (will be checked!), Hard hats must be worn at all times while in the mine, No sleeveless shirts or tank tops. Due to the limited number of slots available to the club for this trip, members are allowed only one trip to PCS per season (exception: trip with “Friends of the AFM”). If you are a member of another club with PCS privileges you will have to choose which club to go in with. If it is found that a NCFC member made multiple trips into the mine with other organizations and also entered with the NCFC group, then this individual will not be able to go to PCS with NCFC in the fall.

Jeff will take calls until all the slots are filled, plus a number of

back-ups. Please remember that your dues must be paid in full in order to be added to the list, and that you must be at least 18 years old to participate.

Our aim is to have 50 bodies in the parking lot raring to go at **7:30 am on the 29th**. Please don't call unless you are sure you can go. If something comes up at the last minute that prevents you from coming, you must call Jeff ASAP so that he can contact the next available person on the waiting list.

Castle Hayne & Rocky Point:

When to be there: Castle Hayne trip: meet at the quarry office at 9:00 am on 03/13 and 04/17; hunt is from 9:30 until 3:30. On 03/19 meet at the office at 11:00. It is to your advantage to try to arrive 15-20 minutes early. This will allow you the chance to mingle and quiz some of the more seasoned collectors about the trip, (where to go, what to look for, special pointers, etc.).

What to Bring (CH, RP, and R): Hardhat (required and **NOT** supplied by the quarry), Sturdy boots/hiking boots - the terrain at these sites is rugged and can be somewhat dangerous and challenging for persons not used to climbing or physical exertion, Walking stick/potato rake, Water, light snack and, of course, your fossil collecting materials.

Precautions: As you are aware, fossil collecting is a privilege bestowed upon us by the very kind and thoughtful Martin Marietta management at the Castle Hayne, Rocky Point, and Richlands quarries. Please show your gratitude by following all rules and guidelines your guide (David and Jim) will explain to you. It only takes one incident to end our opportunity, so have fun, but **think and be safe.**

Green's Mill Run (GMR):

When to be there: This trip normally begins promptly at 9:00 am. Collectors should try to be at the Elm Street Park parking lot between 8:30 and 8:45AM to allow the leader to advise collectors of the GMR guidelines and address any questions. For directions, see map.

What to bring: Chest waders/hip waders/rubber boots (suggested, but not required), Floatable screen, Long handled shovel, Insect repellent, Drinking water, light snack.

Precautions: Green's Mill Run involves wading in and digging gravel from the creek bottom. There is the possibility of pollution. Due to various debris that is found (*i.e.*, broken glass, metal fragments, sharp objects, etc.), this site is probably not appropriate for young children.

Membership List

Most of this issue is taken up by the annual membership list. Use it to companions to share transportation to Club events (or whatever). Please don't share it with persons who have no need to know this information.

Trish Kohler Treasurer

I bet you thought these are some kind of *Hexanchus* or *Notorhynchus* teeth. The feature which strongly contradicts this identification is the very noticeable nutrient groove in the root of each tooth. They are probably from an undescribed species of *Galeorhinus*. Found by Eric Sadorf (with fine screening: the larger tooth is about 3 mm wide) they are from the Comfort Member of the Castle Hayne Limestone.

Member William H. Lawrence, Jr., has recently sent me photos of fossils he has found while stationed in Iraq. See *Janus* 2008#1 for pictures William sent previously. His email address is wlawrence3@aol.com - I'm sure he'd like to hear from you.

William H. Lawrence Jr, on patrol in Iraq, about 10 miles from the Jordan border.

This is a picture he took using a microscope on a stone he found full of ???.

A stromatolite, perhaps.
